

CONSPEC Partners with RAMJACK for Sub-Saharan Africa

PRESS RELEASE

For Immediate Release (January 15, 2015) – CONSPEC Controls has unveiled a new partnership agreement making RAMJACK the Sub-Saharan Africa distribution partner for CONSPEC Controls gas detection and control systems.

“We are very excited to be re-entering the Sub-Saharan market with RAMJACK,” said David McCullough, Sr. Vice President, CONSPEC Controls Limited. “Our monitoring and control technologies are perfect for the harsh environments in Africa and we are looking forward to working together with RAMJACK to meet the requirements of mining customers in the region.”

CONSPEC has been serving the global mining industry since 1968 and is a leader in the field of gas detection. Their gas monitoring systems are approved for use in hazardous areas of underground coal mines and are designed for easy and economical expansion. The system continuously monitors CO and other toxic and combustible gases and can be configured to communicate alarms throughout the mine.

“This is very exciting technology for RAMJACK’s real-time, safety monitoring portfolio,” said Mike Jackson, Co-Founder and Director, RAMJACK Pty Ltd. “With CONSPEC’s gas monitoring and control systems entering our product range, RAMJACK is fully equipped to provide mining operations throughout Africa with the sensors and the networks required to remotely monitor the safety of people and equipment underground.”

For over 45 years, CONSPEC Controls has built an international reputation for cost-effective product design that addresses specific and dynamic environmental monitoring challenges. This enables CONSPEC Controls to provide solutions for gas detection and process control which is ideally suited to the needs – and customizable to the unique conditions – of any underground mining operation in Sub-Saharan Africa.

About CONSPEC Controls Limited

CONSPEC Controls is internationally recognized as a leader in the design, development, manufacturing and support of ventilation management, gas detection instruments, post blast monitoring and control systems for the mining industry. Combining state-of-the art manufacturing with cutting-edge research, CONSPEC’s specialized instrumentation and equipment solves the gas issues of hard rock mines, coal mines, industry mineral mines and tunneling applications below and above ground.
