

CONSPEC[®]

CONSPEC Appointments Darrell Gillis as Business Development Manager

APPOINTMENT NOTICE

For Immediate Release (October 19, 2015) – Dave McCullough, President of Canadian Operations, CONSPEC Controls Ltd., is pleased to announce the appointment of Darrell Gillis to the position of Business Development Manager. Mr. Gillis brings more than 35 years of mining experience to CONSPEC Controls, where he will be responsible for Canadian sales to mine and tunnel operators. He previously served as Vice President Sales (North America) at Newtrax Technologies and Canadian General Manager at Becker Canada. A graduate of the Haileybury School of Mines and Nipissing University, Mr. Gillis will be based in Sudbury ON.

“We are excited to welcome Darrell Gillis to the CONSPEC Controls team,” said Dave McCullough. “As CONSPEC Controls continues to grow, both in terms of product offerings and operations, we know that Darrell’s knowledge and expertise in hard rock mining will have a very positive impact on our ability to help our customers maximize their operational efficiencies while protecting the well-being of Canadian Miners.”

"I am pleased to become a part of what I know to be the most technologically sophisticated ventilation management, post blast monitoring and control systems companies in the world. As Vice President at Newtrax and General Manager at Becker Canada, I directly experienced the advantages that CONSPEC offers, said Mr. Gillis. "My mandate is to build and deepen relationships with Canadian mine and tunnel operators in order to increase their operation’s output while protecting their staff."

About CONSPEC Controls Limited

A proven, reliable leader in process controls and atmospheric monitoring for underground mining since 1968, CONSPEC Controls is internationally recognized as a leader in cutting-edge research, state-of-the art design, manufacturing and support of ventilation management, gas detection instruments, post blast monitoring and control systems for the mining industry. With over 150 mine installations worldwide and offices in Canada, USA, Australia & China, CONSPEC specialized instrumentation and equipment are MSHA, IECeX and ATEX certified for use in hazardous environments.
