

Canada's one source for underground safety and communication.

CONSPEC Controls and Tunnel Radio: two respected companies delivering the promise of customizable solutions for gas monitoring, underground leaky feeder, wireless air quality monitoring and auxiliary fan controls. And beginning in 2016, CONSPEC is your Canadian source for the Tunnel Radio innovative communications product line.

High performance products like the Tunnel Radio UltraComm® digital leaky feeder voice and data systems which are completely compatible with virtually all major leaky feeder systems. And the advanced Tunnel Radio MineAx® RFID tracking solution, providing the critical ability to locate people and equipment underground using only your leaky feeder backbone.

CONSPEC Controls and Tunnel Radio: providing information you can rely on to maximize your mine's safety, efficiency & productivity.

CONSPEC®

Innovation that digs deeper.
